

How to manage your SharePoint and Microsoft 365 collaboration rollout

A Gravity Union Webinar

Housekeeping

1. Use the Q&A panel to ask questions or share comments
2. The recording will be sent out and posted on our YouTube channel

What we'll cover today

- ✓ Definitions of Microsoft 365 **governed** vs. **ungoverned** models
- ✓ Scenarios and examples of each approach
- ✓ Process and sample project plan
- ✓ Finding a balance with governance that takes into account compliance, security and privacy needs

Introductions

Jas Shukla

Senior Consultant

- ✓ 15 years experience in enterprise technology consulting
- ✓ Previously with Microsoft on the SharePoint product team
- ✓ UX designer in a previous life

Michael Schweitzer

President and CEO

- ✓ 20 years of enterprise technology experience
- ✓ Microsoft and Collabware certified
- ✓ Collabware MVP recipient
- ✓ Vancouver Office 365 user group board member
- ✓ ARMA Canada guest speaker
- ✓ Collabware User Group Board Member
- ✓ SharePoint Saturdays guest speaker
- ✓ Over 100 SharePoint ECM projects completed

Who we are

A boutique compliance-inspired services firm helping organization in their digital transformation journey

Microsoft
Partner

Gold Cloud Productivity
Gold Collaboration and Content
Gold Project and Portfolio Management

Gold Certified

Collabware Partner

Microsoft Viva and Content Services Partner

- One of a few companies in Canada in the program
- Recognized by Microsoft for the success we deliver to customers with Microsoft Content Services technology
- Partner with Microsoft, providing feedback on the product functionality and roadmap
- Special support from Microsoft for our project work

Experience Overview

60+

Years of combined
Collabware
experience

50,000+

Users using our
SharePoint and
M365 solutions

40+

Microsoft
certifications

30+

Collabware and
Collabspace projects

10+

Years of average
SharePoint
experience across
our team

18

Collabware certified
consultants

100+

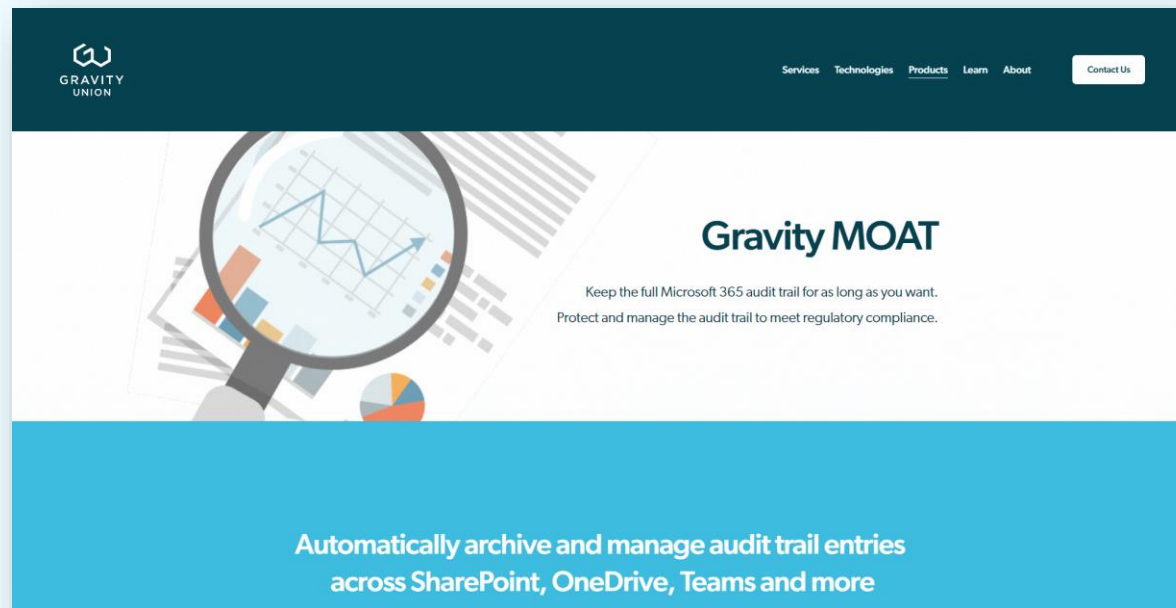

Million documents
migrated and
managed in our
solutions

100%

Project success rate

Makers of MOAT (M365 Audit Trail)

- ✓ World's first compliance-based audit trail back-up for Office 365

- ✓ <https://www.gravityunion.com/moat>

**What is a governed vs.
ungoverned model?**

We're asking the questions

Do we let end users build their **own** sites (without controls, rules, guidance)?

Or do we build a site **for** end users (with best practices, design patterns, processes)?

The two personalities of SharePoint

The DNA of SharePoint is both ungoverned and governed, decentralized and centralized

Decentralized approach (ungoverned)

A decentralized model allows users to freely create Teams, SharePoint and Microsoft 365 resources as needed.

Benefits

- ✓ Quick to market
- ✓ Low cost (upfront)

Drawbacks

- Lack of consistency
- Potential high cost over the long-run
- Usability issues as content scales
- Potential lower value over the long-term
- Increased solution volatility

Centralized approach (governed)

A centralized model involves upfront planning to design reusable solution components for SharePoint, Teams and Microsoft 365 resources.

Benefits

- ✓ More consistency
- ✓ Easier to use
- ✓ Lower cost over the long-run
- ✓ More stable solution
- ✓ Downstream effort focuses on added value activities

Drawbacks

- Slower to market
- Higher upfront cost

It's on a spectrum...

Decentralized approach (ungoverned)

A decentralized model allows users to freely create Teams, SharePoint and Microsoft 365 resources as needed.

Benefits

- ✓ Quick to market
- ✓ Low cost (upfront)

Drawbacks

- Lack of consistency
- Potential high cost over the long-run
- Usability issues as content scales
- Potential low value over the long-run

Centralized approach (governed)

A centralized model involves upfront planning to design reusable solution components for SharePoint, Teams and Microsoft 365 resources.

Benefits

- ✓ More consistency
- ✓ Easier to use
- ✓ Potential lower cost over the long-run (less band-aid fixes, more focus on delivering value)

Drawbacks

- Slower to market
- Higher upfront cost

Scenarios and examples

Ungoverned case study #1

- ✓ An organization was ransomed, and they had to quickly save on-premises content somewhere
- ✓ They put the entire organization's content into a single OneDrive account
- ✓ They quickly ran into security and scalability issues

Ungoverned case study #2

- ✓ In many organizations, Teams is rolled out to enable remote work
- ✓ This quickly leads to “Teams sprawl” as anyone can create new Teams, Groups and Sites
- ✓ Usability and consistency issues over time

I belong to too many Teams

I don't know where to find/share something

I don't know who has access to this

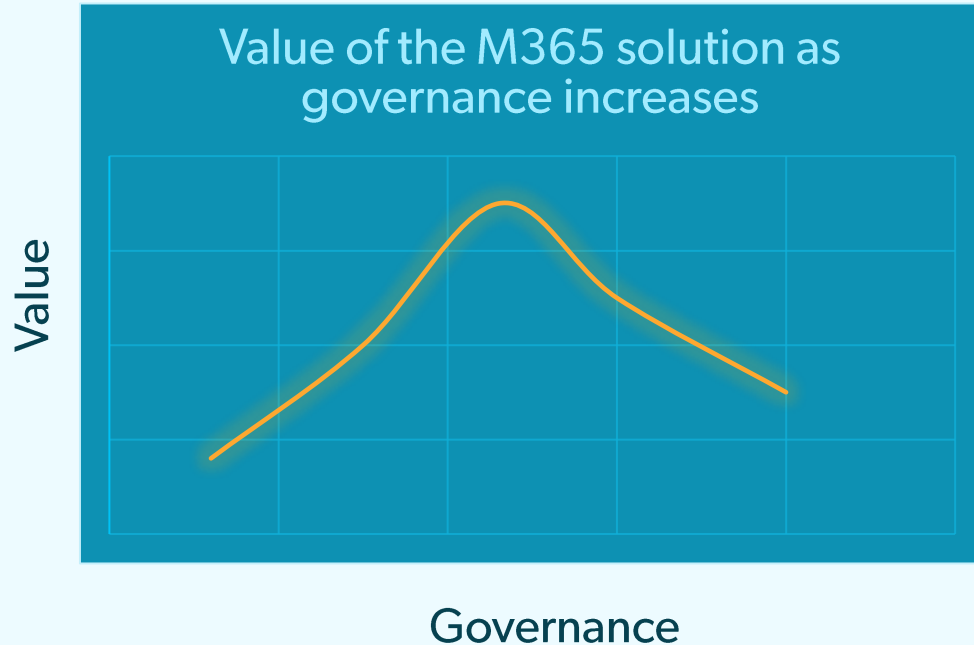

Ungoverned case study #3

- ✓ SharePoint 2016 was released to the organization with little to no planning, training, guidance
- ✓ Ended up with a messy SharePoint solution that end users found frustrating to use and avoided using it
- ✓ Significant effort from IT to fix problems on the platform
- ✓ Little budget left over to add value (Workflows, Integration, Records Management, Reporting)
- ✓ Ended up moving to a different platform (it wasn't the platform's fault)
- ✓ Now moving into SharePoint Online and trying it again
- ✓ Would have been cheaper to take a governed approach

When M365 is ungoverned, we typically see:

- ✓ Time to market\initial cost as priorities
- ✓ Cost and sustainment over the long-term is not considered
- ✓ Compliance and security requirements not being met
- ✓ Usability issues and slowing user adoption
- ✓ More solution volatility with break-fix changes instead of added-value solutions

M365 Maturity Model

- The more you govern, the more value, up to a point
- Not every type of site needs the same governance e.g. projects, community of practice
- It's worth spending time on governance for critical content that has higher degree of importance or longer life

It's not one-size-fits all

Example #1

Department listing

Department list

- ✓ It's common for an organization to require a standardized and centralized list of departments for reuse within lists, libraries, forms, etc.
- ✓ Benefits: consistency, productivity

Without a governed approach

- ✓ Many (12's? 100's?) lists of departments across the organization
- ✓ How do we search? (IT, it, Information Tech, Information Technology, Computer People)
- ✓ How do we maintain? (How to add and rename departments)

With a governed solution

The screenshot displays the Gravity Union Compliance application interface. At the top, a dark blue header contains the word "Compliance" on the left, a search bar with the placeholder "Search for keyword", and links for "Advanced search" and "Saved templates" on the right. A left-hand navigation menu includes "Reviews", "File Plan", "Workflows", "Templates", "Security", and "Tools". The main content area is titled "Untitled Policy" and shows a breadcrumb path: "Gravity Union Corporate File P... > Policies and Procedures". The primary task is "New Content Rule", which includes a "Preview query" link. The rule configuration shows a "Match" dropdown set to "All" and a list of conditions: "Content Type" contains the word or phrase "Policy". Below the conditions are buttons for "+ Condition" and "+ Group". At the bottom of the main area, there are "Back to start" and "Add to Policy" buttons.

Add to Policy

Benefits

- ✓ Consistent user experience
- ✓ Cost savings when deploying the solution to departments
- ✓ Easier to search\find regardless of location
- ✓ Create cross departmental solutions (policies portal)
- ✓ More easily apply value-add solutions like Records Management
- ✓ More workflow reuse that targets the policy content type
- ✓ Easier to create reports (list of expired policies, unreviewed)

Other Examples

Contracts

- ✓ Ability to see and manage all contracts across the organization
- ✓ Manage records in a consistent way (storing all contracts for 7 years after the Contract end date)

Vendors\Clients

- ✓ Managing a central list of clients and\or vendors
- ✓ Tagging related items (project, contracts, correspondence)

Approach to governance

Some planning is required

Upfront work involves:

- ✓ Define roles and responsibilities (what the project team does vs. what end users do)
- ✓ Make your key decisions upfront and express those decisions in guidelines, procedures etc.
- ✓ Automate where possible (site\Teams requests)
- ✓ Organize end users into bite-size chunks

Teams Governance workshop

GRAVITY UNION

Governance working session #1

Feedback just in

www.gravityunion.com

Session objectives

- During this session we will:
 - Recap governance topics and objectives
 - Guided discussion: Provisioning and IA
 - Identify questions to be resolved (parking lot)
 - Next steps

Schedule

- Completion Target: May 21, or earlier

Feb 26 Mar 8-31 Apr 6-Apr 22 Apr 26 May 3 May 10 May 17

Final review → IA → Working sessions → Roll out → Subsequent → Rollout → Progress

Anything new to share about output?

Why focus on collaboration governance?

- Streamline the deployment of Teams and groups
- Help keep TOL's collaboration system secure as possible
- Help ensure the best return on investment for cloud collaboration technology
- Note: we're not focused on Intune, RM, other parts of the M365 stack

Questions to answer

Teams Provisioning

- What is the overall creation process - do we approve teams before they are created?
- What permissions and guest access are applied?
- What channels, tabs, libraries are available?
- What are the templates (if any)?
- What is the naming convention?

Teams Management and lifecycle

- How do we avoid sprawl and findability issues later?
- How do we ensure ownership over time?
- What are the records management implications?
- How do we close down inactive/archived teams?

Example guidelines

We've documented all our **lessons learned** and **best practices** to share with all our future clients:

- ✓ Information Architecture
- ✓ Security
- ✓ Privacy
- ✓ Applied Record Management
- ✓ Migration
- ✓ Change Management (training, communication and Support)
- ✓ Governance (roles, responsibilities, guidelines, procedures)

Strategic roadmap

Benefits Rating			0.67	1.00	0.67	0.33	0.67	1.00	0.67	0.00	0.00	1.00	0.00

Strategic roadmap

- ✓ Work our way from the least risky groups (size, complexity, support, capacity, ability) through to more risky groups (bigger, complex content, less availability, lower capacity to engage)

- ✓ Benefits are:
 - ✓ Team becomes more capable
 - ✓ More pre-made solutions
 - ✓ Success stories influencing downstream decision makers

Lessons learned

Taking governance too far

We don't want too much governance

- ✓ Governance should be about enabling the business
- ✓ Automate as much as possible
- ✓ Don't want to get in the way of people
- ✓ Think about cost/benefit balance
- ✓ Keep it lean!

Example

- ✓ Situation: Content types developed through code, pushed out to different environments, managing code through Jira, creating test plans etc.
- ✓ Publishing a site column goes from 5 minutes to 8 hours
- ✓ Want to be lean and agile and getting the most out of the process

Example

- ✓ Lengthy forms to request new Teams/sites
- ✓ Process is slow, manual, bloated
- ✓ Process needs to be streamlined e.g. “create, and ask questions later”

Summary

Takeaways

- ✓ More ROI for a solution that is governed properly
- ✓ Reusable solutions will save time in the long-run
- ✓ Downstream activities tend to focus on added-value projects instead of fixes
- ✓ Less effort to troubleshoot and maintain properly governed solutions
- ✓ Governance can be fun!?! (but requires practice)
